

Coach360 Manual Test Pack ****For non-technical testers**** Complete click-through instructions for Epics 1–5, plus reference sheets you can keep open while testing. Version: July 2026 · Document: mobile-app-test-pack

Part 1 — Quick Reference (read this first)

Where to test

Ask your team lead for the exact links for your environment. Typical URLs:

What	Staging (testing)	Production (live)
Mobile app (browser)	<code>https://app-staging.coach360.com</code>	<code>https://app.coach360.com</code>
Admin dashboard	<code>https://admin-staging.coach360.com</code>	<code>https://admin.coach360.com</code>
Native app (phone)	TestFlight / internal build link from the team	App Store / Play Store

You can run **all mobile tests in a desktop browser** using the mobile web link. Use a phone only for keyboard/status-bar checks (test E1-T2).

Accounts you will create

Create **three separate sign-ups** during testing. Use different email addresses for each. You do **not** need to check your inbox — email verification is **disabled** on the test environment (Supabase email sending limits).

Role	Example email (Gmail trick)	Used for
Coach	<code>yourname+coach@gmail.com</code>	Content, sessions, invites, subscriptions
Player	<code>yourname+player@gmail.com</code>	Joining teams, Store, locked features
Team Manager	<code>yourname+manager@gmail.com</code>	Creating teams, roster management

Gmail alias tip: Messages sent to `you+anything@gmail.com` all arrive in your normal Gmail inbox.

Admin account (Epic 5 only): The team must give you a pre-made admin login. You cannot sign up as Admin from the mobile app.

Account tracking sheet (fill in as you go)

Role	Email used	Password (your note)	Plan chosen	Trial used?
Coach			Basic / Trial / Advanced / Pro	Yes / No
Player			Basic / Advanced / Pro	Yes / No
Team Manager			Basic	Yes / No
Admin			n/a	n/a

Stripe test card (payments only)

Never use a real credit card in staging. Only this test card:

Field	Value
Card number	4242 4242 4242 4242
Expiry	Any future date (e.g. 12/34)
CVC	Any 3 digits (e.g. 123)
Name / postal code	Anything

After paying, wait ~30 seconds, then **close and reopen the app** before reporting a plan change as failed.

Subscription plans (what they mean)

Plan	What testers should know
Free trial	14 days, one time per account. Full Pro access during trial. Yellow banner on Home shows days left.
Basic	Free forever. Many features locked (Chat, AI, etc.).
Advanced	Unlocks Chat and coach creation tools.
Pro	Unlocks AI Insights, Objectives, and other Pro-only features.

Roles (who can do what — simplified)

Role	In one sentence
Coach	Creates training content and sessions; can optionally create a team.
Player	Consumes training; joins teams via invite; cannot invite or remove others.
Team Manager	Must create a team during setup; can invite players on Basic plan.
Admin	Uses the separate Admin website to configure feature locks (not the mobile app).

Finding your way around the mobile app

Bottom tabs (Coach / Player / Team Manager after onboarding):

Tab	Name on screen	Main purpose
1	Home	Dashboard, trial banner, AI/Objectives cards
2	Roster (or Teams)	Teams list, invites, player list
3	Schedule	Calendar and + Add Session (coaches)
4	Chat	Messages (Advanced+ required)
5	Store	Training packages marketplace

Other important controls:

Control	Where to find it
Sign Out	Home → gear icon (top right) → scroll down → Sign Out
Manage Subscription	Home → gear icon → Manage Subscription
Profile / settings	Gear icon (top right on Home)

Sign-out is only available after you finish onboarding and reach the main Home screen with tabs.

Common screens you will see

Screen title	When it appears
Welcome / Create account / Sign in	Not logged in
SELECT YOUR ROLE	During sign-up
CHECK YOUR EMAIL	<i>Not used on test environment</i> — sign-up goes straight into the app
CHOOSE YOUR PLAN	After profile setup
Feature Locked	Pop-up when your plan is too low for a feature
Chat Locked	Chat tab when below Advanced
INVITE PLAYERS	Roster → Teams → Invite
JOIN TEAM	Player entering an invite code

Recommended test order

Run tests **in epic order**. Later epics reuse accounts from earlier ones.

1. **Epic 1** — Smoke (2 tests)
2. **Epic 2** — Create all three accounts (6 tests)
3. **Epic 3** — Teams and rosters (7 tests)
4. **Epic 4** — Plans and payments (10 tests) — **do before Epic 5**
5. **Epic 5** — Feature gating on mobile (10 tests)
6. **Epic 5 Admin** — Optional, needs admin login (4 tests)

Estimated time: 3–5 hours for a full first pass, longer if you hit payment sync delays.

How to report a failure

Copy this template into email or your bug tracker:

Test ID: (e.g. E4-T6)

Result: FAIL

Account email:

Role / plan: (e.g. Player, Basic)

Device / browser: (e.g. iPhone 15 Safari, or Chrome desktop)

Time (approx):

Steps taken: (what you tapped)

Expected: (from the test table)

Actual: (what happened instead)

Screenshot: (attach)

For every test, mark **PASS** or **FAIL** on the Quick Results Sheet at the end of this document.

Part 2 — Test Instructions

Audience: Non-technical testers. You only need to be able to tap/click around the app. No coding, no tools — just the app, an email inbox, and this checklist.

Epic 5 (RBAC & tier feature gating) builds on Epic 4 — run the Epic 4 subscription tests first, then continue with Epic 5 below.

Before You Start

What you need

1. **The app** — either installed on your phone (iOS/Android test build) or the web/staging link provided by the team.
2. **At least 3 distinct email addresses** for separate accounts — a **Coach**, a **Player**, and a **Team Manager**. You do **not** need to open your inbox during sign-up (email verification is turned off on the test environment).
 - Tip: if you use Gmail, you can reuse one inbox with aliases, e.g.
`yourname+coach@gmail.com` , `yourname+player@gmail.com` , `yourname+manager@gmail.com` .
All mail arrives in your normal inbox if you ever need it for invite-by-email tests.
3. **A Stripe TEST credit card** (no real money is charged):
 - Card number: `4242 4242 4242 4242`
 - Expiry: any future date (e.g. `12/34`)
 - CVC: any 3 digits (e.g. `123`)
 - Name/postal code: anything
4. Optionally a second phone or a private/incognito browser window, so you can be signed in as two different users at once (useful for the team invite tests).
5. **For Epic 5 admin tests only:** the **Admin dashboard** URL (ask the team — e.g. `admin-staging.coach360.com`) and an **Admin account** the team has provisioned for you. Admin tests are optional if you only have mobile access.

How to report results

For every test below, mark **PASS** or **FAIL**. If something fails:

- Note the **test ID** (e.g. `E3-T2`).
- Write down **what you did** and **what you saw** instead of the expected result.
- Take a **screenshot** of the screen (including any red error message).
- Note the **email address of the account** you were using and the approximate **time**.

Two things to know before testing

- **No email verification step.** After you tap **Create account**, you go straight into profile setup — there is no **CHECK YOUR EMAIL** screen and no verification link to click. (Verification is disabled on the test environment due to Supabase email sending limits.)
 - **Payments take a moment to sync.** After paying with the test card, the app is updated by a background process. If your plan doesn't change immediately, **wait ~30 seconds, then close and reopen the app** before calling it a failure.
 - **Never enter a real credit card.** Only use the test card above.
-

Epic 1 — App Foundation (Smoke Tests)

Most of Epic 1 is behind-the-scenes setup (databases, build pipelines) that can't be tested by clicking. Only these basics apply to you:

E1-T1: App launches

Step	Do this	You should see
1	Open the Coach360 app on your device.	The dark welcome screen with the orange COACH360 logo, the tagline "Basketball coaching and player development", and two buttons: Create account and Sign in . No crash, no blank white screen.

E1-T2: Keyboard and screen behave on a real phone

(Only if you are testing on an actual phone, not a browser.)

Step	Do this	You should see
1	Tap Sign in and tap into the Email address box.	The keyboard slides up and does not cover the box you are typing into.
2	Rotate the phone / check the very top of the screen.	The clock/battery status bar area is readable and the app content is not hidden underneath it.

Epic 2 — Accounts, Sign-Up, and Onboarding

E2-T1: Create a Coach account

Step	Do this	You should see
1	On the welcome screen, tap Create account .	A SELECT YOUR ROLE screen with three choices: Coach, Player, Team Manager .
2	Tap Coach , then tap Continue .	A CREATE ACCOUNT screen saying "Signing up as Coach".
3	Enter a name, your <i>coach</i> email address, and a password (at least 6 characters). Tap Create account .	You enter the app immediately — no "check your email" step. The coach profile setup form appears (next test).

Also try: on step 3, enter a password shorter than 6 characters — the app should stop you.

E2-T2: Coach profile setup

Step	Do this	You should see
1	After first sign-in as a Coach, fill in the coach profile form (it asks about your coaching background and whether you work independently or with a team).	The form saves without errors.
2	Continue past the profile step.	A CHOOSE YOUR PLAN screen (trial / paid tiers / "Continue with Basic for free"). This is covered in Epic 4 — for now choose Start free trial .
3	Continue.	A short guided tour (progress dots at the top) with steps: Welcome → Your profile → Browse training packages → Plan your first session → Share with players.
4	Step through the tour. Confirm you can skip the team/invite parts.	You land on the Home screen with your name in the header.

E2-T3: Create a Player account and player onboarding

Step	Do this	You should see
1	Sign out (Home → gear icon top-right → Sign Out), or use a second device/incognito window. Create a new account, this time choosing the Player role, using your <i>player</i> email.	Same sign-up flow as the coach — you land in the app right away (no email verification).
2	Fill in the player profile: age , position (e.g. "Point Guard"), and optionally a photo.	The form saves without errors.
3	At the plan screen, tap Continue with Basic for free (we save the trial test for Epic 4).	You move on to the player tour.
4	Step through the player tour: Welcome → Your profile → Browse training content → Start your first drill → Track your progress → Join a team.	You can complete it without joining a team. The "Join a team" step is optional/skippable.
5	Finish the tour.	The player Home screen, with tabs at the bottom: Home, Progress, Schedule, Chat, Store.

E2-T4: Create a Team Manager account

Step	Do this	You should see
1	Sign out and create a third account, choosing Team Manager , with your <i>manager</i> email.	The manager profile form (asks about your experience managing teams) — no email verification step.
2	Complete the profile.	You are required to create a team before you get into the main app (team creation details are tested in Epic 3, test E3-T1).

E2-T5: You stay signed in after closing the app

Step	Do this	You should see
1	While signed in as any user, fully close the app (swipe it away from the app switcher on a phone, or close the browser tab).	—
2	Reopen the app.	You are still signed in and land back in the app — no sign-in screen.

E2-T6: You cannot get in without signing in

Step	Do this	You should see
1	Sign out.	You are returned to the welcome screen.
2	Close and reopen the app.	You see the welcome/sign-in screen only. There is no way to reach Home, Roster, Chat, etc. without signing in.

Epic 3 — Teams, Invites, and Rosters

E3-T1: Team Manager creates a team

Step	Do this	You should see
1	Sign in as your Team Manager account (continuing from E2-T4).	The Create Team form.
2	Fill in: team name (e.g. "U14 Eagles"), a description, minimum and maximum age (e.g. 12 and 14), and season/league details. Upload a team logo photo if possible.	All fields accept input; the logo picker opens your photo library.
3	Save the team.	The team appears with its name and logo. You reach the main app.
4	Go to the Roster tab → Teams → tap Manage on your team. Change the description and save.	The EDIT TEAM screen opens, the change saves, and the updated text shows on the team card.

E3-T2: Coach creates a team from Roster (optional path)

Step	Do this	You should see
1	Sign in as your Coach account (which is on a free trial, so it has full access).	—
2	Go to the Roster tab.	A Teams/Players toggle. If no team exists yet: a "No teams yet" message explaining teams are optional.
3	Tap + Create Team , fill in the form, save.	The team appears in the Teams list.

E3-T3: Generate an invite and have a Player join

You need the **Coach** (or Team Manager) signed in on one device/window and the **Player** on another. If you only have one device, just copy the invite code on paper and switch accounts.

Step	Do this (as Coach or Manager)	You should see
1	Roster tab → Teams → tap Invite on the team.	An INVITE PLAYERS screen with an Invite code (like ABCD1234) and an Invite link , each with a Copy button. Text says invites expire in 14 days.
2	Tap Copy code .	Button briefly changes to "Copied!".

Step	Do this (as Player)	You should see
3	On the Home screen, find the join-team option (or open the invite link the coach shared).	A JOIN TEAM screen with an Invite code box.
4	Type the code and tap Check code .	The team's name appears as a preview — confirm it's the right team.
5	Tap Join team .	You are joined; the app returns Home and shows your team context.

Step	Verify (as Coach or Manager)	You should see
6	Roster tab → Players (or tap Roster on the team).	The player you just joined is listed with a "Player" badge.

E3-T4: A wrong invite code is rejected politely

Step	Do this (as Player)	You should see
1	On the JOIN TEAM screen, type a made-up code like WRONG123 and tap Check code .	A clear, human-readable error (e.g. the invite was not found or has expired). Not a crash or a blank screen.

E3-T5: Add a player manually by email

Step	Do this (as Coach or Manager)	You should see
1	Roster tab → Teams → Invite on the team. Scroll below the invite code section.	A form to add a player by email address .
2	Enter your Player account's email and submit.	Success — the player is added to the roster (check the Players list). Entering an email that has no Coach360 account should show a clear error instead.

E3-T6: Remove a player from the roster

Step	Do this (as Coach or Manager)	You should see
1	Roster tab → Players .	The roster list, with a Remove button next to each player.
2	Tap Remove on your test player.	The player disappears from the list.
3	(If push notifications are enabled on the player's device) check the player's phone.	The player receives a notification about the roster change.

E3-T7: Tier limits on team features

Team features are only available on certain plans. Check the doors are locked correctly:

Step	Do this	You should see
1	Sign in as the Player account (Basic, no trial). Go to Roster-related areas.	Players never see Invite/Remove controls.
2	If you have a Coach on the Basic plan (no trial): Roster → Invite .	A Feature Locked pop-up appears instead of the invite screen (coaches need a higher plan to invite). The pop-up is covered in Epic 4, test E4-T5.
3	As the Team Manager (Basic is enough for managers): Roster → Invite .	The invite screen opens normally.

Epic 4 — Plans, Free Trial, and Payments

Reminder: use only the test card 4242 4242 4242 4242 , any future expiry, any CVC.
After paying, give the app ~30 seconds and reopen it if the plan hasn't updated yet.

E4-T1: The plan choice screen after sign-up

(You already saw this in Epic 2 — this test checks the details.)

Step	Do this	You should see
1	Create one more fresh account (any role, new email). Complete the profile.	The CHOOSE YOUR PLAN screen.
2	Read the screen.	A highlighted 14-Day Free Trial box with a Start free trial button; a list of paid plans (Basic , Advanced , Pro) each with prices and features and a Choose ... button; and a Continue with Basic for free link at the bottom.

E4-T2: Start the free trial and see the countdown

Step	Do this	You should see
1	On the plan screen, tap Start free trial .	You enter the app.
2	Look at the Home screen.	A yellow banner: " Free Trial - X days left ", "Full Pro access", a Trial active badge, and a Subscribe button.
3	Tap the gear icon (top right) → Manage Subscription .	The SUBSCRIPTION screen shows Current Plan, a Trial active badge, " X days remaining ", and "Full Pro access until your trial ends".
4	While on trial, try a Pro feature: Home screen → the AI Insights card, or Objectives .	They open — trial gives full Pro access, nothing is locked.

E4-T3: The trial can only be used once

Step	Do this	You should see
1	Using an account that already used its trial — sign out and back in, then look at the plan screens (e.g. a paywall pop-up, or the plan choice screen if it appears).	The trial offer is gone . Where it would appear you instead see " Free trial used — Your one-time trial has already been activated on this account and cannot be restarted." There must be no button anywhere that starts a second trial.

E4-T4: What a Basic user cannot do (paywall doors)

Use your **Player** account (Basic, never paid).

Step	Do this	You should see
1	Tap the Chat tab.	A locked screen: " Chat Locked — Upgrade to Advanced to message" with an Upgrade button.
2	On Home, tap the AI Insights card (it shows a padlock and "Upgrade to Pro to unlock").	A Feature Locked pop-up (next test).

E4-T5: The paywall pop-up itself

Trigger the pop-up as in E4-T4, then check each part:

Check	You should see
Required plan is named	Text like "This requires Pro (or Advanced) ..." — it tells you exactly which plan you need.
Plans listed	Plan cards with prices and features. Plans below the required one are greyed out and marked "Below required" — you cannot select them.
Trial button rules	Start free trial appears only if this account never used its trial. (Check with both a fresh account and a used-trial account.)
You can walk away	Browse free content takes you to the Store; Maybe Later closes the pop-up and you can keep using the rest of the app. Being blocked from one feature never traps you.

E4-T6: Upgrade with the test card (Stripe checkout)

Use the **Player** (Basic) account.

Step	Do this	You should see
1	Open the paywall pop-up (E4-T4) and tap Upgrade to Advanced (or go to gear icon → Manage Subscription → Upgrade on a plan).	You are taken to a secure Stripe payment page showing the plan and monthly price.
2	Pay with the test card 4242 4242 4242 4242 .	Payment succeeds and you are returned to the app.
3	Wait ~30 seconds, reopen the app, go to gear icon → Manage Subscription .	Current Plan now shows your new plan, with a "Renews on ..." date. The plan card is marked Current .
4	Retry the feature that was locked (e.g. Chat for Advanced).	It now works.

E4-T7: Billing history

Step	Do this	You should see
1	As the account that just paid (E4-T6): gear icon → Manage Subscription , scroll down.	A Billing history section listing your payment with the amount, date, and a paid badge.
2	As a fresh account that never paid.	Billing history shows "No invoices yet" (or is not shown at all) — never someone else's invoices.

E4-T8: Upgrading again is immediate

Step	Do this	You should see
1	As the Advanced account, go to Manage Subscription and tap Upgrade on Pro .	Small print reads "Applies immediately with prorated billing".
2	Complete the upgrade.	Within a minute your Current Plan shows Pro , and Pro features (AI Insights, Objectives) unlock right away.

E4-T9: Downgrading is scheduled, not immediate

Step	Do this	You should see
1	As the Pro account, on Manage Subscription , tap Downgrade on a lower plan.	The button asks you to confirm (Confirm downgrade) and shows a notice about what happens to your data.
2	Tap Confirm downgrade .	A yellow Downgrade scheduled box appears: "Switching to ... on \<date>. You keep full access until then. Objectives and AI history are preserved but hidden until you upgrade again." The lower plan is marked Scheduled .
3	Immediately try a Pro feature.	It still works — you keep full access until the billing period ends.

E4-T10: Cancelling out of payment does nothing bad

Step	Do this	You should see
1	Start an upgrade, but on the Stripe payment page press Back / close it without paying.	You return to the app on your old plan . No charge, no error, nothing changed.

Not testable by clicking (for awareness only)

These Epic 4 behaviours exist but need a developer or time travel to verify — do **not** mark them as failed:

- **Trial expiry after 14 days** — the account should drop to Basic and locked features should show the paywall. (Requires waiting 14 days or a developer shortcut.)
 - **"Trial ending soon" warning notification** (sent ~3 days before expiry).
 - **Failed renewal payment** — the account should enter a "Payment issue" locked state (a red banner appears on the Subscription screen). A developer must simulate the failed payment. If you ever *do* see the red "Payment issue" banner unexpectedly, report it.
-

Epic 5 — Role & Tier Feature Gating (RBAC)

Epic 5 makes sure each role only sees features their plan allows. The rules apply everywhere in the app — a locked feature should show the same **Feature Locked** pop-up whether you tap the tab, a card on Home, or an action button.

Use these accounts from earlier epics:

Account	Plan needed for Epic 5
Coach	One on Basic (no trial), one on Advanced or active trial
Player	Basic (already created in Epic 2 / 4)
Team Manager	Basic (already created)
Admin	Admin dashboard login (admin tests only)

E5-T1: Trial users see browse-only Store

Step	Do this	You should see
1	Sign in as a Coach or Player on an active free trial (yellow trial banner on Home).	—
2	Tap the Store tab.	Package listings are visible.
3	Read the top of the screen.	An orange Browse only card: "Trial preview — purchase unlocks on a paid plan."
4	Tap any paid package, then tap Purchase ...	Either the purchase flow opens or a Feature Locked pop-up appears. Note which — if purchase succeeds on trial, report it (the banner says paid plan required).

E5-T2: Coach on Basic cannot create content

Step	Do this	You should see
1	Sign in as your Coach on Basic (chose "Continue with Basic for free" or trial expired).	Home screen.
2	Scroll the Home screen.	No + Create Content button anywhere on Home.

E5-T3: Coach on Basic cannot add sessions

Step	Do this	You should see
1	As the same Coach on Basic , tap the Schedule tab.	The weekly calendar.
2	Tap + Add Session .	A Feature Locked pop-up saying chat/session creation requires Advanced (or similar). You do not reach the "NEW SESSION" form.

E5-T4: Coach on Advanced (or trial) can create content and sessions

Step	Do this	You should see
1	Sign in as a Coach on Advanced (paid upgrade from Epic 4) or a Coach still on active trial .	—
2	On Home , look for + Create Content .	The button is visible. Tap it → CREATE CONTENT screen with Training Drill / Video Upload / Game Strategy options.
3	Go to Schedule → tap + Add Session .	The NEW SESSION form opens (no paywall).

E5-T5: Players and Team Managers never see Create Content

Step	Do this	You should see
1	Sign in as your Player account. Check Home.	No + Create Content button (players cannot create content at any tier).
2	Sign in as your Team Manager account. Check Home.	No + Create Content button.

E5-T6: Chat locked below Advanced for all roles

Step	Do this	You should see
1	As Player on Basic , tap Chat .	Chat Locked — "Upgrade to Advanced to message."
2	As Coach on Basic , tap Chat .	Same locked screen.
3	As Team Manager on Basic , tap Chat .	Same locked screen.
4	Upgrade any one of those accounts to Advanced (Epic 4 flow), reopen the app, tap Chat again.	The messages list opens — no lock screen.

E5-T7: AI features locked below Pro for all roles

Step	Do this	You should see
1	As Coach on Advanced (not trial), tap the AI Insights card on Home.	Feature Locked pop-up requiring Pro .
2	As Player on Advanced , check Home for AI-related cards.	Locked or absent — not fully usable without Pro.
3	As any role on active trial or Pro , tap AI Insights .	It opens — trial counts as Pro-level access.

E5-T8: Objectives require Pro (coaches)

Step	Do this	You should see
1	As Coach on Advanced (not Pro, not trial), find Objectives on Home.	Shows Pro or a locked card: "Upgrade to Pro for objectives."
2	Tap it.	Feature Locked pop-up requiring Pro .
3	As Coach on Pro or active trial , tap Objectives → Manage .	The OBJECTIVES list opens.

E5-T9: Paywall pop-up rules (RBAC consistency)

Trigger any locked feature (e.g. Chat on Basic), then verify:

Check	You should see
Required plan named	"This requires Advanced " (or Pro) — exact tier named.
Lower plans disabled	Plan cards below the required tier are greyed out and marked Below required .
Escape hatches work	Browse free content and Maybe Later both close the pop-up; you can keep using the rest of the app.
Same pop-up everywhere	Tapping Upgrade on the Chat locked screen shows the same pop-up as tapping a locked Home card.

E5-T10: Team invite rules by role (matrix check)

Step	Do this	You should see
1	Coach on Basic (no trial): Roster → Invite .	Feature Locked pop-up (coaches need Advanced+ to invite).
2	Team Manager on Basic : Roster → Invite .	INVITE PLAYERS screen opens normally (managers can invite on Basic).
3	Player : Roster tab.	No Invite or Remove controls anywhere.

Epic 5 — Admin Dashboard Tests

Skip this section if you were not given an Admin account or dashboard URL.

E5-T11: Admin feature gating screen loads

Step	Do this	You should see
1	Open the Admin dashboard URL in a browser. Sign in with your Admin account.	Admin sign in succeeds; you reach the dashboard.
2	Navigate to Content (sidebar or menu).	Page titled Content with subtitle about marketplace operations.
3	Scroll down.	A Feature gating by role section under Content Paywall , with three tabs: Player , Coach , Team Manager .
4	Tap each tab.	A table listing features (e.g. Chat, Create Content, AI) with a Tier dropdown per row.

E5-T12: Admin can change a feature tier requirement

Step	Do this	You should see
1	On Content → Feature gating by role → Coach tab, find the Chat row.	Current tier shows Advanced (unless someone changed it).
2	Change the Tier dropdown to Pro .	The dropdown saves (may briefly show a loading state). No error message.
3	Change it back to Advanced when finished testing E5-T13.	Saves successfully.

E5-T13: Admin gating change reaches mobile without app update

This is a two-person or two-browser test (Admin dashboard + mobile app).

Step	Do this	You should see
1	Confirm a Coach on Advanced can open Chat normally (E5-T6 step 4).	Messages list, not locked.
2	In the Admin dashboard (E5-T12), set Chat / Coach tier to Pro .	Saves.
3	On mobile: sign out, sign back in as that Coach (or force-close and reopen the app).	—
4	Tap Chat .	Chat Locked or Feature Locked requiring Pro — even though the account is still on Advanced.
5	Cleanup: Admin resets Chat / Coach back to Advanced . Sign out/in on mobile. Chat works again for Advanced coaches.	—

E5-T14: Admin free content catalog

Step	Do this	You should see
1	On Content , scroll to Free content catalog (Basic tier) .	Title field, Category field, and Add button.
2	Enter title <code>Test Free Drill</code> , category <code>basics</code> , tap Add .	The item appears in the list below with a Remove button.
3	Tap Remove .	The item disappears from the list.

Note: The free catalog is managed in Admin today. If Basic-tier users do not yet see catalog items differently in the mobile Store, that is expected — test the Admin CRUD only.

Not testable by clicking (for awareness only)

- **Server-side enforcement** — blocked actions are also rejected on the server (403 errors). You cannot verify this without developer tools; do not mark mobile PASS/FAIL based on it.
 - **Full access matrix** — only launch-critical rules are live; the complete 223-rule matrix is deferred post-MVP.
-

Part 3 — Quick Results Sheet

Print this page and check off results as you go.

Test	Pass / Fail	Notes
E1-T1 App launches		
E1-T2 Keyboard/status bar		
E2-T1 Coach sign-up		
E2-T2 Coach profile + tour		
E2-T3 Player sign-up + tour		
E2-T4 Team Manager sign-up		
E2-T5 Stays signed in		
E2-T6 No access without sign-in		
E3-T1 Manager creates/edits team		
E3-T2 Coach creates team		
E3-T3 Invite code/link + player joins		
E3-T4 Bad invite code rejected		
E3-T5 Manual add by email		
E3-T6 Remove player		
E3-T7 Tier limits on team features		
E4-T1 Plan choice screen		
E4-T2 Trial + countdown		
E4-T3 Trial only once		
E4-T4 Locked features for Basic		
E4-T5 Paywall pop-up details		
E4-T6 Upgrade with test card
